

# Little Sheep Learning

## Hello from [Little Sheep Learning](#)

October has been a great month for us here at [Little Sheep Learning](#) and now we really are looking forward to Christmas. We are pleased to announce that we were featured in [mychild magazine](#) in an article about Mums in Business, we were awarded the accolade of BT tradespacer of the [week](#) and we were a finalist in [Enterprise Nation's Home Business Award](#). We've also added some more new products (see later in the newsletter).

### Competitions

Congratulations to Jane from Stoke on Trent, who won a copy *The Complete First Experiences* book for her [review](#) of the [Today's Chart](#). Our next competition will be the children's Christmas Colouring Competition to be launched shortly.

### November's [Special Offers](#)

To celebrate the winner of our 'Write a Review' competition, this month we have a saving of 20% on [Today's Chart](#). This is a great fabric calendar to help your children learn about

the days of the week, months of the year, seasons and the weather.

### New Products

We have added a range of [Fine Motor Activities](#) to help children develop the manipulation and dexterity skills needed whilst having fun. In this range we have [Snap beads](#) - brightly coloured, textured beads that snap together easily, [Tactile beads](#) - large tactile foam beads that make threading easy and fun and [Chunky threading shapes](#) - colourful and chunky, soft shapes that can be threaded in many different ways, plus we have my favourite product the [Floopy](#).

The [Floopy](#) consists of a chunky, flexible, stripy pipe and six brightly coloured textured jumbo sized foam beads that can be threaded onto it. This toy is great toy for children who are starting to develop threading skills and can help improve dexterity, hand-eye co-ordination, colour recognition, tactile and fine motor skills.

These fine motor activities are all great for developing mathematical, sequential and sorting skills, learning colours and shapes as well as improving hand-eye co-ordination and fine motor dexterity whilst having lots of fun. Look out for more fun fine motor activities to be added in the future.

Thank You

**Elaine**
